Note:

- The ratings are updated at regular intervals on race day to reflect scratchings and track conditions. Please check back on race day, or when track conditions change, to obtain updates.
- The Neural rating is a multi-factor rating. As such, the Neural Price will be more reflective of an actual 'market' price and chances of winning (than other single-factor ratings).
- Other rated prices shown, are based on a single-factor rating and as such, should only be used as a guide to the 'strength of the rating rank'. E.g. a \$2.10 Top Ranked Race Time runner, is a much stronger Top Ranking than a \$5.00 Top Ranked Race Time runner etc.
- The ESettle Position is based on 'historical' run-style. This can be compared to the ESpeed Ranking to determine if a runner has the early speed ability to match its 'desired' position in running.
